

# Honduras – San Pedro Sula La Ceiba Global Youth Tobacco Survey (GYTS)

## FACT SHEET . . . . .

The Honduras-San Pedro Sula La Ceiba GYTS includes data on prevalence of cigarette and other tobacco use as well as information on five determinants of tobacco use:

access/availability and price, environmental tobacco smoke exposure (ETS), cessation, media and advertising, and school curriculum. These determinants are components Honduras could include in a comprehensive tobacco control program.

The Honduras-San Pedro Sula La Ceiba GYTS was a school-based survey of students in grades 7, 8 and 9

conducted in 2003. A two-stage cluster sample design was used to produce representative data for all of San Pedro Sula La Ceiba. At the first stage, schools were selected with probability proportional to enrollment size. At the second stage, classes were randomly selected and all students in selected classes were eligible to participate. The school response rate was 77.8%, the student response rate was 86.0%, and the overall response rate was 66.9%. A total of 644 students participated in the Honduras- San Pedro Sula La Ceiba GYTS.

### Prevalence

- 42.6% of students had ever smoked cigarettes (Boys = 48.5%, Girls = 37.6%)
- 22.5% currently use any tobacco product (Boys = 28.7%, Girls = 17.4%)
